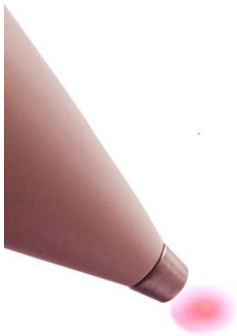
Biopulse Pro Su Jok package 690 EUR

With these features, Biopulse Pro can be used as a stand-alone device working independently from the software and computer.

1) Automatic searching over of reflexology areas/correspondence zones on palms, spine, etc. for imbalanced areas and treatment with colour generated automatically when an imbalanced area is detected. This feature also allows you to scan the zones revealing the most optimal zones for influencing by therapeutic measures you practice.

2) Biopulse Pro is a colour pen being able to generate 8 colors. The LED is built in the device.



In addition to the features included as a stand-alone device, we added 2 desktop software related to Su Jok acupuncture by default:

Su Jok Pro v.2.0 - the software for measuring acupuncture points according to Korean style called Su Jok method. In this software it is possible to examine 24 points in relation to classical method of Su Jok – 5 elements and measuring 5 points on each meridian to know its substructure.

Su Jok 6 Ki - the software for measuring acupuncture points according to Su Jok method – 6 Ki.

Supplies of Biopulse Pro Su Jok package:

Device itself as an active/passive probe with an inbuilt nozzle for testing about 5 mm diameter, passive electrode, 2 interchangeable tips, a built LED in the nozzle for colour therapy, USB cable, electrodes for frequency therapy.
Measurement results are sent via Bluetooth.
Li-ion rechargeable battery lasting several years.

LED: can be managed by the main button on the device shifting from one colour to another in a 8 colour pen mode.

2 interchangeable tips: one for colour generating, 1-2 mm diameter, usually working on the auricular or hand points of Su Jok acupuncture.

The second tip, a spring-like with a limiter of the pressure to observe the same loading on the points, usually applied in the EAV method but can be used for Su Jok or auricular points testing), passive electrode and USB cable for connecting to the device.
